Client: Carillion/ Alfred McAlpine

Location: Manchester Airport, Manchester

Cross Services Engineering Limited (CSEL) were appointed by Carillion/ Alfred McAlpine as the M&E Design & Installation Contractor for the new Third platform at Manchester Airport Station. The project commenced in July 2008 and was completed in November 2008 with a total M&E value of £150k.

CSEL were responsible for:

- Platform Lighting
- Platform Power Supplies
- M&E aspects of waiting shelters
- CCTV supplies
- PA Supplies

CSEL were also responsible for the design element of this project, which was completed to Form EB Status.

CSEL have now completed a number of projects at Manchester Airport giving them great experience of organising projects under tight security and of working within an area that is still open to the public.

CSEL are pleased to work on such a key site in the North West providing added value to the airport and enabling a better commuter experience.
