**Client:** Murphy's

**Location:** Sandhills, Liverpool

Cross Services Engineering Limited (CSEL) were appointed by Murphy's as the M&E Contractor at Sandhills station. The project commenced in January 2008 and was completed in December 2008 with a total M& E value of £320k.

CSEL were responsible for:

- Mains Distribution and small power supply
- CIS (Customer Information Services) supplies
- PA System supplies
- CCTV System supplies
- Intruder Alarms System
- Access Control System
- Platform lighting/ General lighting to Station Buildings
- Disabled Toilet Alarms
- Plumbing to Station Buildings
- Heating & Ventilation Systems to Station Buildings

CSEL completed the station on time and on budget and were pleased to have been involved with such a well designed station which really does have kerbside appeal in an area that has already seen much regeneration. CSEL were delighted to work with Murphy's and Mersey Rail to provide enhanced transport links for commuters.
